## GP Patient Survey 2017 Results

NHS England together with Ipsos MORI, have published the latest Official Statistics from the GP Patient Survey. The survey provides information on patients overall experience of primary care services and their overall experience of accessing these services.

Data is weighed by age and gender so that results resemble the eligible registered list population of each practice and CCG.

The latest survey consisted of around 2.15 million postal questionnaires sent out to adults registered with GP practices in England from January 2017 to March 2017.
